

Better Chemistry. **Better Business**

## Case Study

Better Chemistry. **Better Business**

- 4). OFF LINE is a flash mix tank where diluted polymer is made down and metered in from a "day tank". The dilution is 0.1% with tap water and metered in to tank #3 at a dose of 10 ppm.
- 5). Clarifier: A clarifier with inclined plates is used to create a quiet area for the solids to fall
